

Road Safety Audit

Accredited Training

Course Information

This course is accredited by the Department of Transport and Planning (DTP). Provides the participant the certification to be a Road Safety Auditor. Includes the updated Austroads Guide to Road Safety Part 6: Road Safety Audit and guidance on Safe System Principles, explaining the differences between Safe System Assessments and Road Safety Audits.

Who Should Attend

- State and Local government personnel
- Engineers, designers, traffic managers, traffic controllers
- Road safety practitioners
- Individuals wanting to become a Road Safety Auditor
- Individuals managing road safety audits

Provides understanding of standards and guidelines such as Austroads Guide to Road Safety Part 6: Road Safety Audit

Attendance at this course provides a certificate for registration as a DTP/VicRoads accredited Road Safety Auditor.

Undertake real road safety audits, and practice writing findings, recommendations and risk ratings in line with Safe System principles
