

# Designing for Pedestrians and Cyclists

Industry led workshop  
2 day training

## Course Information

Guide and support Urban Designers, planners, practitioners, and other interested professionals whose ultimate goal is to improve safety for pedestrians and cyclists. Provides participants with a highly interactive program which exposes the challenges and resolutions of planning and designing optimal safety for pedestrians and cyclists.

## Who Should Attend

- Scoping and Development Engineers
- Urban Designers
- Walking and cycling advocates
- Active transport policy and decision makers, strategists, planners, and managers
- Strategic Planners and Traffic Managers
- Consultants involved in traffic transport, road safety, and planning

16

CPD Hours

### PRACTICAL APPLICATION

Provides an understanding of pedestrians and cyclists' requirements. Designing a sustainable urban transport system of the future. Making cities livable, fair, vital and healthy places to live and work in.

### INDUSTRY LED

Transferring knowledge from industry experts to practitioners and road authorities.

### INTERACTIVE

We use real life examples of projects, allowing you to apply your technical expertise and enhance knowledge in a collaborative manner.

## About us | Trainers

### **Bernard Chan**

**BEng Civil (Hons)**

Bernard an Associate Director with Trafficworks, specialising in transport planning.

### **Daniel Mustata**

**BEng Civil (Hons)**

Daniel is the Principal Engineer at Road Solutions Pty Ltd, specialising in road safety.

### **Alison Dewar**

**BEng Civil (Hons)**

Alison an Associate at Trafficworks with extensive experience in the design and road safety auditing of pedestrian and cycling facilities.

## Course outline

### Day 1

- The role of walking and cycling in the transport network
- 20 minute neighbourhoods
- Planning for pedestrians and cyclists
- Embedding Movement and Place into active transport
- Practical activity

### Day 2

- Designing for pedestrians and cyclists
- Using the standards and guidelines
- International best practices
- Practical activity (design review)
